Profile

I am a highly motivated and results-oriented professional with a strong analytical background and a proven ability to deliver impactful solutions in risk management, operations, and credit analytics. Known for approaching challenges with a positive and methodical mindset, I have consistently demonstrated leadership, innovation, and collaboration, earning multiple "Employee of the Month" nominations throughout my career.

Professional Experience

Stenn | Risk and Operations Lead **June 2024 - Present**

A leader within Stenn's product and tech domain, reporting directly to the VP of Data. I played a pivotal role in scaling the risk and operations strategy, driving automation, and influencing cross-functional stakeholders. As part of the risk and operations leadership team, I contributed to the company's strategic direction and was recognized for my impact, earning an Employee of the Month nomination within my first four months.

- **Automated Decisioning Implementation:** Spearheaded the design and implementation of a decision engine, automating 7% of financing requests (worth ~\$1M in monthly revenue). This initiative transformed a previously manual processes, creating a scalable framework for growth and operational efficiency.
- **OKR and target setting:** Collaborated closely with the COO and functional leaders to define and track measurable companywide OKRs. Regularly presented progress and strategic insights to stakeholders during functional town halls.
- **Risk Committee ownership:** Established and chaired the monthly risk committee and business performance reviews. Aligning leadership on strategic priorities and highlighting the impact of key initiatives across the company.

Klarna | Senior Credit Risk Analyst **November 2021 - May 2024**

Relocated from London to Berlin to join Klarna's Credit Risk Decisioning team. The team is responsible for underwriting and managing the risk portfolio for Klarna's core European markets (Nordics, DACH, Netherlands and Belgium) with a monthly gross merchandise value of €2.7bn.

- **Implementing credit risk strategies to achieve the business plan targets:** Had a lead role in finding key inefficiencies in our current underwriting policies to reduce our net losses. I have delivered multiple policy rule amendments, limit adjustments and implemented new credit models. All of which have improved performance for the business and enabled us to meet targets set for the financial year.
- **Developing to market credit risk strategies for Switzerland:** I designed and built the initial go to market strategy for the Swiss market. This project got me nominated for employee of the month.
- **Setting up standardised processes for third party data suppliers:** Change the internal process of how we interact with third party suppliers. This new process has given us more opportunities to improve our underwriting policies whilst also enabling us to negotiate cheaper contract prices. Impact has resulted in £150k saving per month.
- **Portfolio monitoring** – Developed MI dashboards and set up bi-weekly meetings to review the status of our markets, merchants, and products to other stakeholders within the business.

Equifax | Senior Credit Risk Analyst May 2018 - October 2021

Part of the Banking and Financial Institutions Client Analytics team helping deliver bespoke credit risk solutions to our clients. The credit bureau exposed me to a range of projects working with both retail and commercial lenders across the credit risk lifecycle.

- **Single Customer View Solution:** I developed a process that helps clients identify the same person across multiple portfolios, this is particularly useful to clients looking to satisfy regulatory FSCS requirements. This project initially generated £40k a month in revenue and had the capability to be offered out to wider clients. My efforts towards this won me employee of the month.
- **Delivery of credit risk modelling to our Banking and FI clients:** Have built bespoke samples and developed scorecards using a variety of credit risk modelling techniques for commercial and retail banks to use in their creditworthiness assessments. I assist a start-up bank with their application strategy that included a thin file specific solution, this involved working closely with executive level founding members.
- **Credit Worthiness Assessment Bill:** Provided evidence to support Lord Bird's Creditworthiness Assessment Bill, a proposal to support the inclusion of rental data within credit assessments. I was awarded the London employee of the month award in my third month at Equifax.

AXA | Data Analyst September 2015 - May 2018

A member of a dynamic Data Analytics team responsible for building and maintaining a complex data warehouses and Supported data-driven decision-making by developing robust reporting infrastructure and analytics solutions.

- **Data Warehouse Management:** Utilized SAS, SQL, and VBA to maintain complex data infrastructure, enabling actionable insights for internal teams and external clients.
- **KPI Tracking and Reporting:** Designed visual dashboards using Tableau and Power BI, enhancing performance monitoring across teams.

Education

University of Sussex: September 2012- June 2015
